

I think the Federal Do NOT Call List sanctions should be raised to match those of the great State of New Jersey. I am appalled by the number of calls that make it to the unsuspecting home owner's phone.

I know a lot of that has to do with those with whom we do business stretching the reality of the make up of their "third party affiliations" that need to know way too much private information about citizens.

However, I think the do not call list sanctions should cut out a lot of unsolicited phone calls.

thank you for your time and attention.
